

# DHSS COVID-19 Reporting Systems

## Electronic COVID-19 Case Reporting System

## LTCF Testing Spreadsheet REDCap System

Who uses this system?

Anyone required to report positive COVID-19 cases

Licensed long term care facilities and the Division of Regulation and Licensure

LPHAs and DHSS staff

LPHAs and DHSS staff

What does this system do?

- Replaces paper CD-1 reporting for COVID-19 cases
- Should be used by all entities required to report COVID-19 cases
- Should not be used by LPHAs to enter case information.
- Case data flows into EpiTrax for case management and follow up

- Allows long term care facilities to upload their COVID-19 testing spreadsheets
- New COVID-19 cases should not be submitted to this system

- Comprehensive disease surveillance system
- LPHAs can enter COVID-19 case data directly into EpiTrax
- Assigns cases to jurisdictions and notifies case investigators

- Integrated, exported contacts from EpiTrax
- Schedule, track, and visualize action taken
- Integrated phone system to centralize contact tracer's work
- Text and email messaging within the system
- Call scripts to use during calls with contacts
